**CARDIOCOMM SOLUTIONS RECEIVES CE MARK APPROVAL FOR HEARTCHECK™
HANDHELD ECG DEVICE SALES IN EUROPE.**

**European Conformity and Private Label Manufacturer (PLM) Rights for
HeartCheck™ PEN and HeartCheck™ ECG Monitor Allow CardioComm Solutions
Branded Sales Direct to Consumer and Patients.**

Toronto, Canada – CardioComm Solutions, Inc. (TSX-V:EKG) (“CardioComm Solutions” or the “Company”), a global medical provider of ECG acquisition and management software solutions is pleased to announce today they have received CE clearance for over the counter (OTC) and prescription-use sales and marketing of their HeartCheck™ PEN ECG and HeartCheck™ ECG Monitor devices. The CE mark approval for the Company specifically identifies CardioComm Solutions as the owner of the HeartCheck™ brand while not being required to be a manufacturer of the products.

CE marking on a product is a declaration that CardioComm Solution’s product complies with the essential requirements of the relevant European health, safety and environmental protection legislation and allows the product to be legally placed within the European market and also ensures the free movement of the product within the European Free Trade Association Countries and the European Union, a single market comprised of 34 countries. CardioComm Solutions’ software associated with the HeartCheck™ products are approved under the Company’s pre-existing CE Mark.

“The audit and inspection process required to secure the CE Mark involved months of work and a full review of our Canadian based facilities. The audit was performed by DQS Medizinprodukte GmbH (Frankfurt, Germany). With the audits completed and CE Mark granted, CardioComm Solutions can now proceed with its overseas market development under the HeartCheck™ device brand in addition to its existing GEMS™ software brand. This will allow the Company to add new proprietary ECG and additional bio-monitoring device solutions as they become available,” said Mr Jon Ward, President and CEO, AJW Technology Consultants, Inc., PharmaMed Clinical, Inc., the Company’s regulatory representation.

“With the CE Mark now being granted, we can proceed to the next step of securing multi-country distributors for the sale of the PEN. Distributor qualifications have been ongoing since the early summer; however, most required the CE mark to be awarded under the HeartCheck™/CardioComm Solutions brand to be able to proceed further,” said Simi Grosman, member of the CardioComm Solutions Board of Directors.

“Today’s CE announcement is a critical success milestone for CardioComm Solutions. CE approval for the sale and distribution of the HeartCheck™ PEN ECG, the HeartCheck™ ECG Monitor and our SMART Monitoring services solution, together with existing CE approvals for our Global ECG Solutions (GEMS™) software, will now permit our entry into all European consumer, medical and prescribed health care markets,” said Etienne Grima, CEO of CardioComm Solutions. “To this point, we have expanded our advertizing efforts within HospiMedica International (English) and HospiMedica en Espanol (Spanish), which in combination with now having the CE mark granted, will support our recent Medica based marketing efforts where meetings were held with several European and Asian device manufacturer and distributor organizations. The Hopsimedica publications will have premium placement of CardioComm Solutions products and HeartCheck™ devices and will be seen by key hospital decision makers and medical equipment dealers/distributors in Europe, Latin America, the Middle East/Africa and Asia/Pacific. With FDA, Health Canada and European sales and marketing approvals secured we can now turn our attention to securing approvals in China and India”, closed Etienne Grima.

About CardioComm Solutions

CardioComm Solution's patented and proprietary technology is used in products for recording, viewing, analyzing and storing electrocardiograms (ECGs) for diagnosis and management of cardiac patients. Products are sold worldwide through a combination of an external distribution network and a North American-based sales team. The company has earned the ISO 13485 certification, is HPB approved, HIPAA compliant, and has received FDA market clearance for its software devices. CardioComm Solutions, Inc. is headquartered in Toronto, Canada, with offices in Victoria, B.C.
